

Burning garbage in a campfire leaves harmful pollutants in and around the area.

## Leave no trace...

## ...in your smoke.

These pollutants can cause or aggravate health problems

- Lung Disease
- Runny Nose
- Burning Eyes
- Chronic Heart Disease
- Asthma
- Bronchitis

Breathing these pollutants has even been linked to premature death

REMEMBER, it is only legal to burn untreated wood and enough paper to start the fire.  
**Never leave a fire unattended!**
